How to enjoy DVD movie on Creative Zen Mozaic?

Concerned much about the regulations depresses you while pursuing fashion gets yourself lost. Charm will always stay with you as long as you choose your own way of expressing. Creative Zen Mozaic tells you how to be yourself. Wherever you are, holding Creative Zen to enjoy your favorite movie or music will turn you to be the audio/video fashion wizard. Fancy enjoying the OSCAR awarded "Slumdog Millionaire" on a bored flight. It cannot be cooler.

Now it is time to show you how to achieve you and realize your dream enjoying DVD movie on Creative Zen Mosaic. There are mainly two steps, convert DVD to AVI video supported by Creative Zen, and transfer the exported WMV video to Creative Zen.

To convert DVD to Creative Zen AVI, you need a DVD Ripper, I recommend this popular DVD Ripper. The DVD Ripper is easy to use, and it also boasts brilliant interface design which matched your Creative Zen Mozaic harmoniously. They could be the best match I have ever seen and used.

Now let's rock and roll.

Step1: Insert DVD disk into DVD ROM of your Computer.

Step2: Install and launch Pavtube DVD Ripper.

Step3: Import DVD movie by clicking the top buttons of DVD ROM" or DVD Folder to the program.

Step5: Hit the button of "Convert" to start converting.

Step6: Now you have got the AVI video for your Creative Zen Mozaic, the final step is to transfer the AVI video to your creative Zen.

Here is a brief tutorial how to transfer audio/video files to Creative Zen Player?

A. Downlaod and Install the software included with your Creative Zen MP3 Player on your home computer (or whichever computer you'll be transferring music files from).

B. Use the USB cable included with your MP3 player. Plug one end into your player and the other into the computer.

C. Turn on your MP3 player. Your computer should automatically recognize the device, but if it doesn't, double-click the My Computer icon on your desktop and then locate and double-click the Creative Media Explorer icon.

D: Double-click the "Import Media" button. This will bring up a wizard that will help you locate and select music files on your computer.

E: Follow the onscreen instructions of the Import Media Wizard to complete the transfer of music files to your MP3 player.
